Good morning everyone,

Hopefully you enjoyed drawing various dragons for the magazine. What was the prize for the winner? A trip to Romania to go dragon spotting? Or maybe a voucher for Honeydukes?

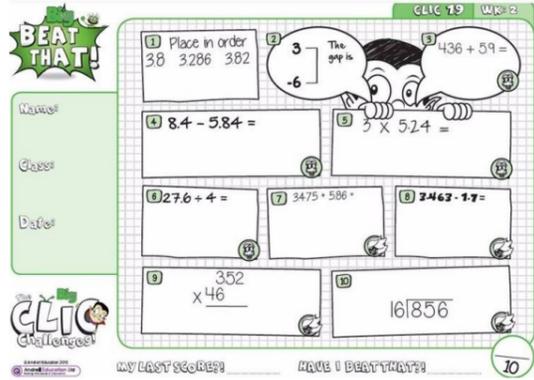

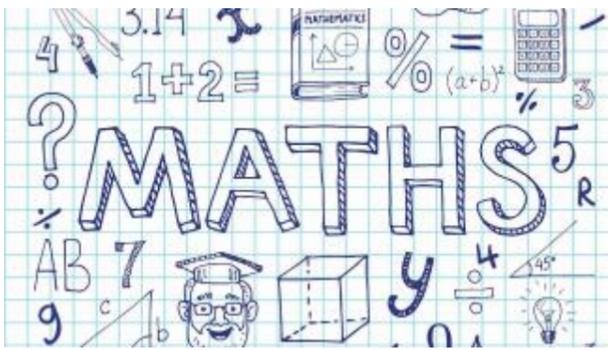

Were you able to create your own poem about your Fantastic Beast? Maybe a slightly more pleasant creature than The Dragon of Death! Perhaps not!

There was some tricky Maths yesterday but being able to double and multiply by 10 was really useful and would have made it easier. Remember, all you can do is try your best.

Today lots of the work will centre around Chapter 15 - The Forbidden Forest. We will think about describing the forest and then use this as the basis to design and make a game. Hopefully you can make good use of this game over the summer holidays.

Have a good day and be creative.

Mr Donovan, Mrs Barber and Mrs Maslin.

### Maths: Lesson 3- Converting units of time

White Rose Maths - <https://whiterosemaths.com/homelearning/year-5/>

Remember you can always try a **different year group** if you are finding it too tricky or want to challenge yourself.

<https://www.bbc.co.uk/bitesize/tags/zhqppq8/year-5-and-p6-lessons/1>

#### CLIC challenge

Find the **CLIC level** you are on and see how you get on. You may want to have a go at the level above too. If you have any questions about your clics send an email to the class email and we can help.

### English:

Today we will read **Chapter 15 - The Forbidden Forest**

<https://www.wizardingworld.com/chapters>.

Think carefully about how the forest is described and how the language creates an atmosphere.

Imagine you were standing on the edge of the Forbidden Forest knowing that you were about to enter?

What would you see? What would you hear? How would you feel? What creatures may be lurking in the forest?

Complete the **Forbidden Forest sheet**

### Creative task - Make a Forbidden Forest game

Over the next few days we are going to create a game set in the forbidden forest. You can then play this game with your friends and family over the summer holidays.

The aim of the game can be to get out of the forest or maybe you have to retrieve something from within the forest?

The game will need to include various creatures and beasts.

You can look at the **video** and **powerpoint** for ideas. You can also use ideas from games you have at home.

Be creative and enjoy
